**Tender Document**

This document serves as an open call for consultancy services for the assignment outlined in this document. This document consists of the following contents:

Part 1. Tender specification

Part 2. Terms of Reference (TOR)

Part 3. Annexes

1 NORAD procurement document “Procurement in the context of projects financed by the Norwegian Agency for Development cooperation”

2. Two pager about the program “Amazon rights in Focus: people’s and forest protection”

## **PART 1: TENDER SPECIFICATION**

### **Short description of the project**

FCDS (Fundacion para la Conservacion y Desarrollo Sostenible), IUCN NL, Mongabay and Ambiente y Sociedad, are the organizations leading the implementation of the “Amazon rights in Focus: people’s and forest protection” program. This 5-year program started in 2021.

This project focuses on reducing forest crime and improving its monitoring in Colombia. The main objective is twofold; to expose forest crime and to strengthen capacities of Indigenous Peoples and Local Communities (IPLCs) and relevant government agencies, so that they can monitor and tackle forest crime efficiently. Exposing forest crime will lead to a reduced pressure on forests from local and global markets. In addition, capacity building will improve rights and livelihoods for IPLCs, contributing to sustainable land use. Together, these two pillars will help to achieve a reduction and reversion of tropical forest loss, which in the long-term contributes to biodiversity protection, sustainable development and achieving the 1.5-degree goal.

In the context of this program, we will contract a third party to investigate the forest crime dynamics. The specialized partner will collect data on these crimes and its impacts. The data will be published on a report and shared with key stakeholders, such as consumer countries, IPLCs, CSOs and local law enforcement agencies.

### **Deadlines**

Applications should be sent by June 27 before 11 am CET.

### **Clarifications of the tender document**

All enquiries regarding this tender document shall be addressed by email: [amazonrights@iucn.nl](mailto:amazonrights@iucn.nl)

### **Application documents to submit**

#### **1) Curriculum Vitae**

The CV should provide: Information about the experience and technical competence of the tenderer. The CV should not exceed the 3 pages.

#### **2) Cover letter**

The tenderer should include a cover letter describing her or his motivation to carry out the assignment and also confirming the acceptance of all the conditions specified the NORAD procurement document “Procurement in the context of projects financed by the Norwegian Agency for Development cooperation”.

#### **3) Financial proposal**

The tenderer shall quote a total price for the assignment including travel and subsistence costs related to field work involving case project/programme visits. All fees and costs shall be quoted in NOK or EURO. The total budget shall specify:

- Fee (hourly or daily)
- Travel and subsistence costs including field-work travel costs
- Other costs if any

#### **4) Work-Plan and Availability**

The technical proposal should include a general work-plan which visualizes the timeline for the completion of the ToRs requirements.

## **PART 2: TERMS OF REFERENCE**

### **TERMS OF REFERENCE**

#### **PROJECT: AMAZON RIGHTS IN FOCUS**

##### **1. DEFINITION AND PURPOSE OF TERMS OF REFERENCE**

This document will form the basis of an agreement between IUCN NL and a relevant party under the NORAD NICFI program "Amazon rights in Focus: people's and forest protection". This document defines the responsibilities and deliverables of the contracted party.

##### **2. BACKGROUND**

a. FCDS (Fundacion para la Conservacion y Desarrollo Sostenible) as lead partner, IUCN NL as co-applicant, Mongabay and Ambiente y Sociedad as local partners, are the organizations leading the implantation of the "Amazon rights in Focus: people's and forest protection" project. This 5 - year program started in 2021

b. The program aims to contribute to halt deforestation in the Colombian Amazon by tackling forest crime in the Amazon forests of Colombia, and to improve the territorial rights and livelihoods of Indigenous Peoples and local communities

c. Forest and environmental crimes in Colombia are interlinked with armed conflict and corruption at all levels. To tackle this, in -depth - and independent investigations are needed.

d. There are vast publications regarding environmental and forest crimes in Colombia, however there are still data gaps which need to be filled to fully understand the forest crime dynamics and its impacts on deforestation rates and IPLCs.

e. The phenomenon of deforestation in Colombia is multi-faceted and complex. It is often linked to and driven by other illegal activities such as drug trafficking, illegal expansion of the agricultural frontier and money laundering. This situation motivated efforts to update the Colombian Penal Code, including the definition of new criminal offenses, including wildlife trafficking, illicit management of exotic species, deforestation, promotion and financing of deforestation, financing invasion of areas of special ecological importance, illegal

appropriation of the nation's vacant plots and land grabbing. Based on this context, **forest crime in Colombia is a much more complex network that includes deforestation and its financing**, as well as land appropriation and the invasion of areas of special ecological importance, crimes that, because they are typified in the Code Colombian penal constitute the focus of analysis of this project.

### 3 OBJECTIVES

The main objective of the assignment is to gather data regarding environmental (forest) crimes dynamics and convergence in the Colombia Amazon and present these findings and analysis in a public report. This data should help to understand the scale, structure and dynamics of forest crime in the Colombian Amazon

### 4. DELIVERABLES

The data should be systematized in a report which should at least contain the following:

- a. Gaps in the legal framework (or its implementation) between Colombia and its neighbors that facilitates illegal logging and deforestation
- b. Update on timber extraction and trafficking dynamics (routes, international and local markets) in the Colombian Amazon
- c. Describe how environmental crimes are related to legal activities driving deforestation in Colombia (convergence), for example palm oil plantations, beef, timber.
- d. Describe main socio environmental impacts of forest/environmental crime in the Colombian Amazon
- e. Analyze how women from local and indigenous communities are affected by the forest crime dynamics
- f. Develop an updated environmental crime stakeholder map. Indicating main actors and the power dynamics within the entire value chain.
- g. Case studies from the departments of interest should be included in the report
- h. Analyze possible opportunities for intervention to reduce forest crime.
- i. Geographic scope of the research will be the Colombian Amazon, with special attention to: Guaviare, Meta, Caquetá and Putumayo

The table of contents will be structured in consultation with IUCN NL based on findings and consultant proposal.

### 5. EXPERTISE REQUIRED

- At least 8 years of experience working on and investigating environmental crimes in Colombia.
- Experience on deforestation related investigations in the region
- Demonstrated track record to carry out extensive field work in high risk areas
- Experience in writing publications for international audiences and for lobby purposes.
- Preferably be able to deliver reports written in Spanish
